

Managed Communications Services for Healthcare

Deliver Secure, Reliable Care with Always-On Connectivity

From telehealth appointments to electronic health records (EHR) and real-time patient coordination, healthcare organizations rely on secure, high-performance communications. Fusion Connect's managed services ensure your network is protected, optimized, and always available—so you can focus on patient care.

Secured network reliability for telehealth & EHR systems

Support real-time, HIPAA-compliant data transfer with high-capacity business internet. Fusion Connect's **Advanced Edge Security** encrypts all data in transit to safeguard patient records and telehealth sessions. With fast connections and **automatic failover**, your healthcare operations remain uninterrupted—regardless of unexpected outages.

Managed WiFi for patients & staff

Provide a **secure, segmented WiFi network** to keep patient, guest, and clinical traffic separate. Patients and visitors can access guest WiFi without compromising medical data security. Healthcare staff benefit from **dedicated, high-priority wireless access** to ensure seamless connectivity for tablets, mobile EHR systems, and medical devices.

Secure voice & communications

Ensure crystal-clear voice communications for hospitals, clinics, and medical offices with **HIPAA-compliant VoIP solutions**. Intelligent call routing directs patient inquiries efficiently, reducing wait times and optimizing call center operations. Use digital business lines for faxing, security alarms, and compliance-driven communications.

Unified communications for collaboration

Enable seamless collaboration between medical teams with secure voice, video, and messaging. **Virtual consultations, remote specialist coordination, and staff training** are simplified with Fusion Connect's unified communications platform. Instant messaging and in-app calling enhance in-hospital or multi-location coordination for faster patient care.

Why Fusion Connect?

Network downtime can disrupt patient care. At Fusion Connect, we build secure networks with redundant connections to keep your operations running even if one connection goes down. Plus, our proactive monitoring and US-based support teams are there to respond quickly to any issues. Trust Fusion Connect to maintain your critical network infrastructure.

They helped us save money and have great support and services. Now that we have 450 employees and are pushing \$70 million, I hope they will be with us the rest of the way.”

Rich Pappa, CIO, MCMC

Network Security & Data Protection

Let our experts handle the complexity of deploying a secure, HIPAA-compliant network to support your essential healthcare applications. With **Unified Threat Management** and **SD-WAN**, we ensure the highest security and performance levels while reducing your bandwidth and infrastructure costs.

HEALTHCARE SOLUTIONS

Managed Infrastructure

A secure and high-performance network is crucial for healthcare, but your needs don't stop there. While each organization is unique, Fusion Connect often adds managed Wifi, wireless failover, advanced edge security, call center, and POTS replacement solutions to build a complete solution.

Unified Communications

ADDITIONAL OPTIONS

Facilitate timely, effective collaboration between staff and patients—whether in-office or remote.

Managed WiFi

ADDITIONAL OPTIONS

Provide secure, segmented WiFi for **staff, guests, and medical devices** to protect sensitive data.

Contact center

ADDITIONAL OPTIONS

Enhance patient engagement with **scalable, HIPAA-compliant communication solutions** that improve responsiveness and reduce administrative burden.
